

OCCUPATIONAL HEALTH AND SAFETY DECLARATION BY M+S HYDRAULIC MANAGEMENT

Environmental Occupational Health and Safety Policy is directed to protect the employees' health and the environment during the manufacturing of the company units.

To fulfill this policy, the company Management introduces the Environmental Management System according to the requirements of ISO14001:2005 and the Occupational Health and Safety Management System in compliance with OHSAS 18001:2007 requirements and as integrated part of the Integrated Quality Environmental and Safety Management System, and appoints Management Authorized Representative, directly subordinated to the Procurator and having delegated all necessary rights to secure the effective operation of the Integrated System, its support and continual improvement.

To implement the Environmental Occupational Health and Safety Policy and achieve the set objectives, the company Management undertakes to:

- Provide the observation of the applicable legal and other regulations in relation to the environment and the health and safety working conditions.;
- Manage the company so as to reduce the negative influence of the production and other activities over the environment;
- Secure effective gathering and treatment of scrap, generated on the company area;
- Reduce the consumption of resources such as materials, water and electricity;
- Provide the reduction of labor traumatism and the professional illnesses;
- Decrease the losses caused by damages;
- Educate the employees to environmentally, health and safety responsible behavior.

The company Management believes that M+S Hydraulic employees are well aware about the determinant role of the environmental, health and safety work for the development and the success of the company, and is sure that everyone, according to his obligations authority and competence, will contribute to the implementation and development of the mentioned above policy and the set objectives of the Integrated Management System.
